## PROFESSIONAL SUMMARY

Full-Stack Developer skilled in Angular, TypeScript, and Node.js, with experience building scalable, high-performance web applications. Strong in front-end optimization, API integration, and database management. Collaborative team player recognized for contribution and commitment, with additional expertise in game sound design and multimedia production. Adaptable and results-driven across diverse technical and creative environments.

## EXPERIENCE

### Full Stack Software Developer Nov 2024 - Present

Strongwill IT Solutions • Remote

- Developed and maintained scalable web applications for the US Home Health and Hospice industry using Angular, TypeScript, Node.js, and NestJS
- Collaborated with cross-functional teams to deliver user-centric solutions, ensuring seamless integration and adherence to industry standards (including HIPAA compliance)
- Managed databases and APIs using MongoDB and Postman, while utilizing tools like Git, Jira, and Jaspersoft Studio to support development, reporting, and workflow efficiency

### Web Developer Mar 2023 - Oct 2024

G Angle Entertainment Cebu Inc. • On-site

- Optimized front-end performance by refining Angular and TypeScript codebases, improving application responsiveness and efficiency
- Applied Git branching strategies to streamline collaboration, reducing merge conflicts and improving team productivity
- Worked closely with cross-functional teams to implement human-centered design, increasing user satisfaction across platforms

### Game Sound Designer and Audio Editor Jun 2018 - Mar 2023

G Angle Entertainment Cebu Inc. • On-site

- Delivered high-quality sound design for AAA and live-service games, collaborating with global teams and Japanese production pipelines
- Performed voice acting and audio processing, supporting character development and narrative immersion
- Developed an internal front-end website using HTML, CSS, and Bootstrap to streamline access to company tools and resources

## EDUCATION

### B.S. Information Technology Class of 2017

Cebu Institute of Technology - University

- Enhanced an Android e-learning platform using Android Studio and MongoDB, improving usability for academic deployment
- Built a Java (J2EE) web application for a company use case, applying enterprise development concepts in a team setting
- Developed a company website and internal task management system using ASP.NET MVC, and contributed to a web-based application for physicians and radiologists, integrating MSSQL Server and Web API 2 for reliable data management
